

Let's

Encrypt

1. Create a backup of the /etc/letsencrypt directory.

2. Run the following command to create a backup of the /etc/letsencrypt directory.

```
cd ~/ && sudo tar zpcvf 2020-11-10-letsencrypt-backup.tar.gz /etc/letsencrypt/
```

3. Copy the backup file to the remote server using scp.

```
scp ~/2020-11-10-letsencrypt-backup.tar.gz user@remote-server:/home/user/
```

```
scp ~/2020-11-10-letsencrypt-backup.tar.gz user@remote-server:/home/user/
```

4. Verify the backup file was copied successfully.

```
ls -l /home/user/2020-11-10-letsencrypt-backup.tar.gz
```

5. Run the following command to extract the backup file.

```
sudo tar zxvf 2020-11-10-letsencrypt-backup.tar.gz -C /
```
